Career Objectives

Wish to continue career as a software engineer where skills in database systems, data processing and mathematical training can be used, with special interest in management systems (ERP, finance). Seeking a responsible job with an opportunity for professional challenges.

Education

- Technical Engineer in Administrative Data Processing, University of La Rioja, 2011.
- Exchange Undergraduate, University of Technology Sydney, 2009.
- Degree in Mathematics, University of La Rioja (Withdrawn in good standing.)
- International Baccalaureate Diploma, 2006.

Work Experience

May 2010 – Present, Innovation Consultant at **Ingeniería e Innovación S.L.**

IT Management

- Developed a human resource management tool for R&D projects in PHP + MySQL that currently manages information of more than 50 client companies and has saved the company up to 10 hours per project.
- Managed a virtualised infrastructure in VMware and led the migration of the company's Intranet from Windows to Ubuntu Linux, which resulted in performances up to 3x faster.
- Developed an open data application for R&D projects that includes automatic syncing of internal and published data. Data is available from the company's website as well as XML.

ICT Project Management

- Composition and review of project proposals, both in English and Spanish.
- Partner search and communication with partners for European projects within the 7th Framework Programme.

Skills

Languages and Communication:

- Native Spanish speaker.
- Advanced English (TOEFL: 98/120).
- Experience in presentations and written reports under tight deadlines.

Team Work:

- Led a group of 7 students during last year at university to complete a 3-month competition with 3 other groups. The project came first at the technical level.

Programming Skills

Language	Skill level	Experience
PHP	Advanced	2 years
MySQL	Advanced	3 years
Javascript + AJAX	Advanced	2 years
Java	Intermediate	1 year
C++	Intermediate	2 years
XML + XQuery	Intermediate	1 year

Personal Projects

- Wrote an open-sourced PHP application that allows to create complex and fully documented WBS (work breakdown structures).
- Wrote an instant search engine using AJAX technology.

Interests

I am interested in transfer of knowledge between industry and academia, and in online education. For instance, I took two online Stanford courses in Computer Science: Introduction to Databases (98%) and Introduction to Artificial Intelligence (93%).
